Writing , playing cricket

Professional Summary

As an aspiring Java Developer with a successful internship at salesken.ai, I bring a passion for crafting robust and user-centric software solutions. I have experience in building micro-services, migrating databases, and debugging both frontend and backend issues. With a strong track record of exceeding expectations and a quick learning ability, I thrive in interdisciplinary teams and deliver high-quality code.

Professional Experience

Salesken.ai | Tech Intern (SoftWare Development)
March 2023 - Present

Salesken is a company that focuses on increasing the performance of sales representatives through cutting-edge AI.

Key responsibilities:

- Built a micro-service that focuses on analyzing and creating precise reports on sales representatives and their team's performance.
- Successful migration of database from ELK to PostgreSQL.
- Debugging and resolving bugs related to both frontend and backend by collaborating with the QA team.
